

(a) Radiation reaching the pedestrian — six-direction budget (VDI 3787 Part 2)

(b) Sky view factor from building outlines

(c) Pavement temperature T_s — surface energy balance

in = out, solved for T_s by Newton iteration; shaded ground keeps 0.74 of its sunlit rise; vegetated share $\rightarrow T_a$

— short-wave (solar)

- - - short-wave, diffuse or reflected

..... long-wave (thermal)

— convection / storage
