

● Street view near the site ($n = 55$)

◆ No street view: panorama 43–110 m away, or failed ($n = 25$)

— 1:1

- - - Extreme heat stress threshold (PET ≥ 41 °C)

③ the imagery-free pathway carries no learning step, so every term is a named physical quantity. ④ inputs measured at the site, swapped one at a time to attribute the error to a specific input. ⑥ a whole neighbourhood is held out, and the correction reverts to physics outside the training domain.
