

(a) Official heat warning

station network and forecast; no radiation term

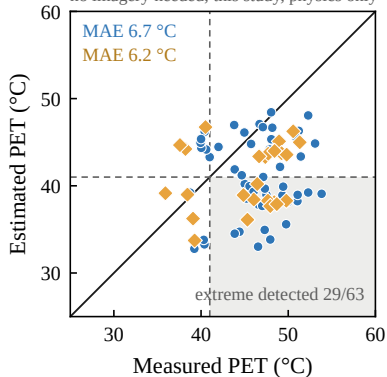

(b) Street-view service

imagery where it exists; engine as operated, 2026

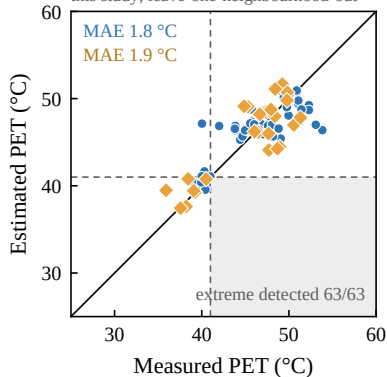

(c) Satellite + building geometry

no imagery needed; this study, physics only

(d) + AI residual layer

this study; leave-one-neighbourhood-out

● all 80 sites — street view not involved (a)

● street view at the site (n = 55)

◆ no street view at the site (n = 25, alley or block interior): in (b) substituted from 43–110 m away or failed

grey quadrant: measured ≥ 41 °C but estimated below — extreme heat missed
